

MAC'ALLAN LTEE COMPANY PROFILE

MacAllan manufactures leather products for both local and foreign markets. The company has been able to diversify to different leather products which caters for both local retail shops , tourists shop, corporate such as banks, hotels, and others. It also exports high quality leather products for famous brands.

MacAllan Ltee also manufactures garments from both knitted and woven fabrics and has the expertise of making many different types of garments as mentioned above. The factory has an advantage in that it does bottoms and tops, kids to adult wear and equipped for both knitted and woven fabrics. Buyers favour factories that can cover many product categories which will allow the firm to reduce the number of factories they must interact with. As the international trend, most U.S. (and European) firms are reducing the number of factories and countries that they will be sourcing from.
